

Aina Wireless PTT Voice Responder

The Aina Wireless PTT Voice Responder offers superior functionality, rugged design and flexible compatibility to provide the safest and simplest communication possible.

COMPATIBILITY

The PTT Voice Responder is compatible with any device and application through its:

- Adaptive Bluetooth 3.0 or 4.0 (BLE) technology compatible with both iOS and Android devices.
- Integrated with all major PTT applications.

KEY BENEFITS

DESIGN & DURABILITY

The PTT Voice Responder's robust design can withstand the harshest environmental conditions and accidental user damage.

- IP67 and MIL-STD 810G approved; 2 meter drop test safe.
- Lightweight and ergonomic design (125g).

FUNCTIONALITY

The PTT Voice Responder elevates the features and functionality of your phone or PTT application of choice to drive communication efficiency.

- Real-time PTT with short latency.
- Emergency button increases safety by allowing a worker in distress to notify dispatch about an emergency.
- Two PTT buttons to simplify communication to two main channels or contacts.
- Two soft buttons with multi-function capability geared to your communication needs and various work scenarios like repeat last message or channel scrolling.
- Audio DSP for noise, wind and static reduction and echo cancellation.
- Call-answer button, volume control and 3.5mm standard audio headset jack.
- 24 hour battery life, micro-USB port for charging and docking station available.

SIMPLICITY

The PTT Voice Responder provides simple Bluetooth pairing through its:

- Near Field Communication (NFC) by holding a mobile phone and the accessory together.
- Unique Bluetooth code, making it easy to differentiate available devices for pairing in a group setting.
